Module 4
Climate and environmental projects in Public Procurement
Introduction

iMonitor

select • monitor • report

Why is corruption in public procurement dangerous, especially in environmental and climate projects?
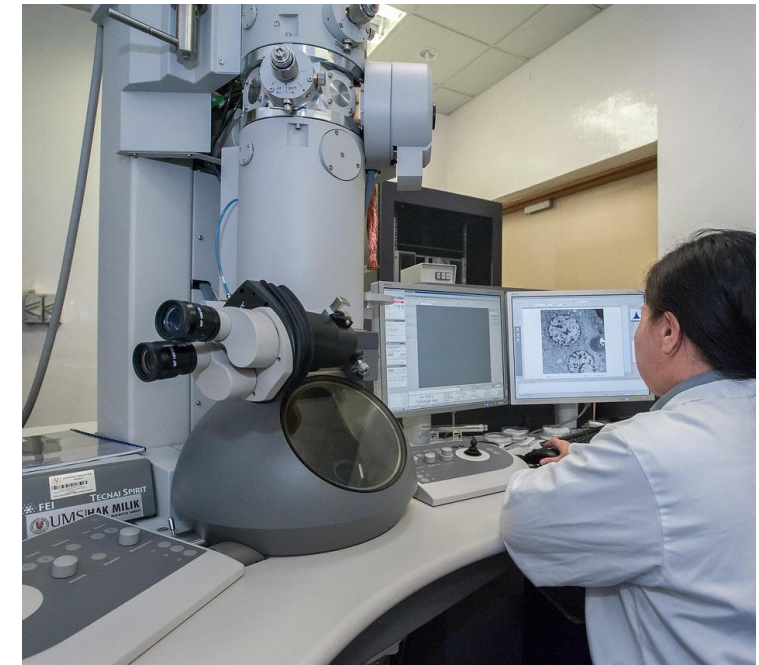

Climate finance

- Climate crisis it's a present emergency
- Climate finance reached 2.1 trillion USD in 2024
- Urgent need to introduce climate and environmental projects
- Corruption – is a silent threat

Why are climate and environmental projects exposed to corruption?

Who Pays the Price?

iMonitor

- ❑ Integrity safeguards are essential

- ❑ Corruption erodes trust, delays progres and jeopardizes our future

Important:

- ❑ Not every irregularity results from corruption

- ❑ Environmental performance depends on many factors

- ❑ Holistic approach is needed

Final thoughts

iMonitor: Catching corruption before it steals our climate future!

Reporting template

- ❏ **Structured tool for monitoring public contracts**
- ❏ **Follows same logic as project monitoring reports**
  - ❏ Step 1: Desk analysis – review contract info & risks
  - ❏ Step 2: Contract implementation – check delivery on the ground
  - ❏ Step 3: Results & impact – assess outcomes vs. objectives
- ❏ **Corruption schemes**
